

our living dinosaurs

STURGEON

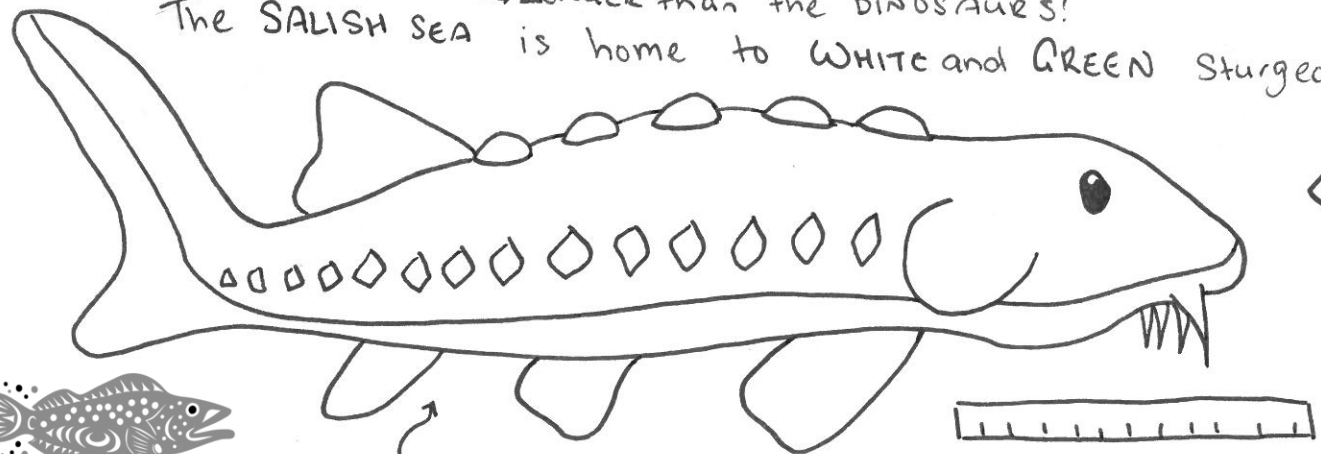

Sturgeon share similarities to **SHARKS!** The tail has a **LARGE** upper lobe and they have a cartilaginous skeleton.

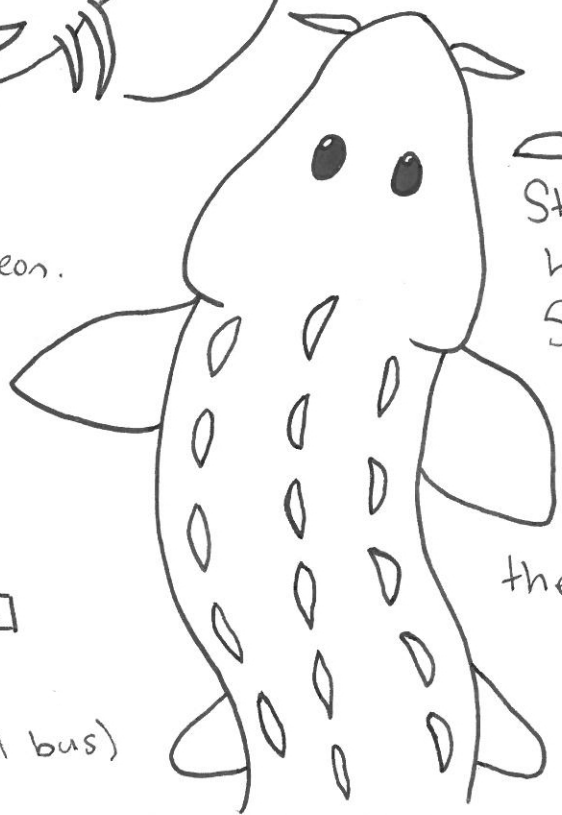

BARBELS help sturgeon find their food through **TOUCH**. Their mouth **SUCKS** up prey like a vacuum using their **PROTRUSIBLE JAW!**

Sturgeon are found **ALL OVER THE WORLD!**
This fish has been around for **200 MILLION YEARS**.
→ **LONGER** than the **DINOSAURS!**
The **SALISH SEA** is home to **WHITE** and **GREEN** Sturgeons.

Sturgeon have **5 rows** of bony **SCUTES** along their body.

White sturgeon can live more than **100 YEARS** and grow up to **6m** long (as long as a small school bus)
